

ABHIPPSA SUBHADARSHINI

Bengaluru, India

abhippsas@gmail.com | +91-9439107390 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Education

Alliance University, Bengaluru

Sep 2022 – Jun 2026

B-Tech in Computer Science and Engineering (AIML)

CGPA: 8.5

Experience

Computer Vision Intern – Center of Excellence, Alliance University

Mar 2025 – May 2025

- Implemented YOLOv8 with OpenCV for defect localization.
- Developed CNN-EfficientNet ensemble to classify detected defects
- Utilized Roboflow for dataset annotation, preprocessing, and model training workflows.

AIML Intern – Lendmefy

Sep 2025 – April 2026

- Worked on a recommendation system using sentence embeddings and similarity scoring to improve search and content ranking.
- Handled HTTP/HTTPS requests using a controller and service layer approach in the backend.
- Worked with PostgreSQL for data management and used tools like Jira, Bitbucket, and Postman for collaboration, version control, API testing, and rapid iteration.
- Developed frontend components using React and TypeScript, integrating REST APIs.

Projects

AI Resume Analyzer with LLM — Python, NLP, Streamlit, MySQL

[Link](#)

- Created an end-to-end RAG pipeline for PDF resume processing, chunking, semantic search, and LLM analysis.
- Designed prompt workflows for correct resume scoring and auto-improvement suggestions.
- Developed document parsing and metadata management with MySQL for resume insights.

Netflix Recommendation System — Python, Pandas, Streamlit, Sentence-BERT

[Link](#)

- Built a semantic recommendation system using Sentence-BERT embeddings and similarity search.
- Built an interactive recommendation interface using Streamlit for improved user experience.
- Developed an interactive Streamlit interface with external API integrations

AI-Powered Multimodal Visual Question Answering for Retail Product Nutritional Analysis

— Python, BLIP, OCR, NLP

[Link](#)

- Built a multimodal VQA system using Computer Vision, OCR, BLIP, and NLP to extract product details and answer user queries from packaging images.
- Hybrid OCR and Vision-Language Model pipeline with multimodal fusion for nutritional analysis and context-aware question answering.
- Added product comparison, speech-based interaction (STT/TTS), and recommendation features to support smarter and more accessible retail shopping experiences.

Technical Skills

Languages: Python, SQL

Frameworks & Tools: Scikit-learn, Pandas, NumPy, Streamlit, GitHub, Power BI

APIs: REST APIs, Google APIs

Machine Learning & AI: NLP, LLMs, Generative AI, Retrieval-Augmented Generation, Computer Vision

Programming Concepts: Model Integration, Prompt Engineering, API Development, Data Visualization

Certifications

- Certified Generative AI Professional – [Oracle](#)
- Natural Language Processing using Stanford CoreNLP – [Infosys SpringBoard](#)
- Generative AI with Large Language Models – [Coursera](#)
- Oracle Cloud Infrastructure 2025 DevOps Professional – [Oracle](#)
- Citi's Technology Software Development – [Forage](#)

Academic Achievements

- Participated and was a finalist in the college-level hackathon.
- Research paper titled *“Plant Disease Detection integrating machine learning with image recognition”* accepted at ICDICI 2025.
